### Be the Expert on the Process

Facil means easy. Your job is to make it easy to participate.

Be the Expert on the Process

- >> Let go of the pressure to have the answers or to solve the problems.
- The answers and solutions exist within the expertise and experiences of people in the room.
- It is your job to unlock the answers and solutions by making conversation, collaboration, and participation easy.

#### Be the Expert on the Process

#### **Positive assumptions**

- » Everyone is here because they believe in the cause.
- » All voices have equal weight.
- » There is a path forward.

**Pro Tip:** For particularly challenging conversations or groups, share these assumptions with the group.

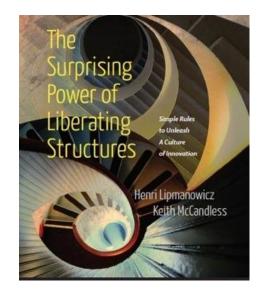

#### Be the Expert on the Process: TOOLS and ACTIVITIES

- TRIZ: Clear space for innovation by helping a group let go of what it knows (but rarely admits) is limiting its success by inviting creative destruction.
- » 1, 2, 4, ALL: Include everyone. Generate better idea and more of them, faster than ever before. Participants own the ideas so buy-in and implementation is simplified.

### Define what success looks like.

# People want to be successful.

Show them how.

Define what success looks like: TOOLS and ACTIVITIES

- **Share a clear purpose statement** with meeting attendees.
- >> Share a success checklist with meeting attendees.
- » Develop and follow a detailed agenda for yourself.

### Ask good questions.

Talk less and ask more. Your advice is not as good As you think it is.

Michael Stanier,
The Coaching Habit (page 59)

Good questions help people give good answers.

Questions are not always easy for your audience or meeting participants to answer. Sometimes participants are nervous, sometimes they are concerned about getting in right, and sometimes they simply do not know the answer.

Good facilitators make coming up with the answer easy by asking the question in a way that draws an image for each participant.

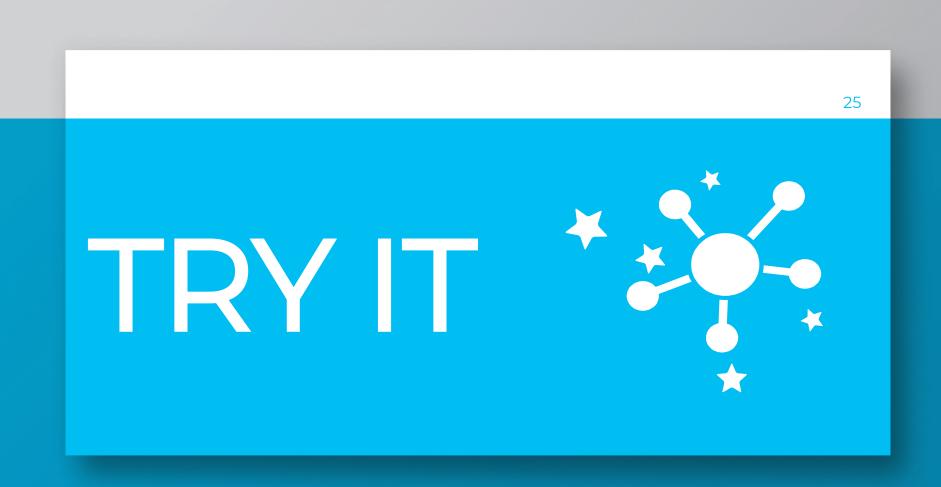

Small Group Activity

#### Ask good questions: TOOLS and ACTIVITIES

#### Build an an image-generating question

- 1. Start with an image-generating phrase: Imagine, Think about, Consider, If...
- 2. Extend the image with at least two phrases so that they can see the answer: what was in front of you, how did you feel, who participated in...
- 3. Ask the direct "you" question

#### **Pro Tip**

Plan your questions ahead of time. Otherwise, you will default to an image-blocking question.

Ask an image-building question for every line in your agenda.

# Use tools to help build agreement and accountability. BPRA

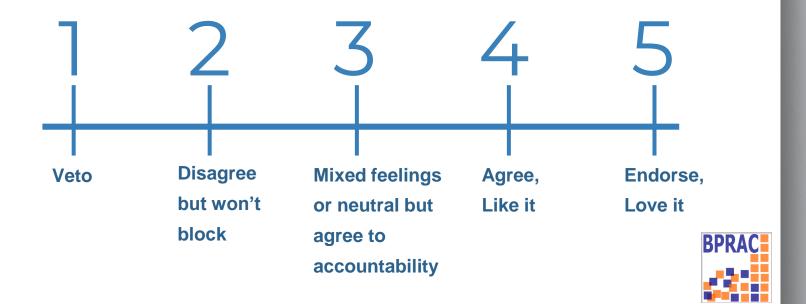

#### Use tools to help you build agreement and accountability

- The goal is to make decisions that the group is supportive of, and to which each individual in the group can be held accountable.
- » Go beyond expressing support in terms of "yes" or "no".

**Pro Tip:** Use the gradients of agreement in workgroups, to build consensus on a shared purpose, or to develop a policy that all sides support. If you're organization uses <u>Robert's Rules of Order</u> or makes decisions by a <u>majority vote</u>, use the Gradients of Agreement to build the statement first. Then, vote on the agreed on statement.
